

FUEL CELLS 2009
 POSTER SESSION
 1/19/09

Shahram Mehdipour-Ataei, Ahmad Rabiee, and Ebrahim Abouzari-Lotf <i>New Sulfonated Copolyimides as a Candidate for PEMFC</i>	1
Anasuya Adibhatla , Joko Sutrisno, Alan Fuchs, Bryce Wallis, Callie R. Handerson, Cahit Evrensel, and Faramarz Gordaninejad <i>Novel Proton Exchange Membrane for Fuel Cells</i>	2
Avni A. Argun , J. Nathan Ashcraft, and Paula T. Hammond <i>Highly Conductive Polyelectrolyte Multilayers for Fuel Cells</i>	3
V. Atanasov , C. C. De Araujo, K. D. Kreuer, and J. Maier <i>Improving Mechanical Properties of Sulfonated Poly(Phenylene Sulfone) by Blending with Polybenzimidazole</i>	4
Oleg Borodin , Qin Liu, Mahesha Herath, Darryl Desmarteau, Stephen Creager, Limei Jin, and Alex Kitaygorodskiy <i>Molecular Dynamics Simulations and Experimental Studies of Fluoroalkylphosphonic Acids</i>	5
Stephen M. Budy and Douglas A. Loy <i>Polymer Electrolyte Membranes for Fuel Cell Applications: Synthesis and Characterization of Sulfonated Poly(Arylene)</i>	6
Byoungpyo Hong, Byoungmin Kwon, Moonyoung Ko And Hongsik Byun , Myungsu Seo, and Youngjoong Kim <i>Preparation Of Electrospun PVDF Composite Membrane For The Application Of Direct Methanol Fuel Cell</i>	7
Michel F. Champagne , Asmae Mokrini, and Lucie Robitaille <i>Processing and Properties of Proton Exchange Membranes Prepared by Melt Extrusion Technologies</i>	8
Yu Chen , Ozma Lane, James E. Mcgrath <i>Synthesis And Characterization Of Multiblock Hydrophobic (Polyarylene Ether Nitrile)-Hydrophilic (Disulfonated Polyarylene Ether Sulfone) Copolymers For Proton Exchange Membranes</i>	9
Chang Gi Cho and Sang Hun Kim <i>Oxidative and Thermal Stabilities of Polymer Blends Containing Phosphonic Acid for Fuel Cell Membranes</i>	10
Kevin R. Cooper <i>Progress Toward Accurate Through-Plane Membrane Resistance and Conductivity Measurement for the High Temperature, Low Relative Humidity Membrane Program</i>	11
Marek Danilczuk , Andrew J. Perkowski , and Shulamith Schlick <i>Comparing The Stability of Nafion and 3M Membranes Exposed to Hydroxyl Radicals: Spin Trapping Experiments</i>	12
Gilles Divoux TBA	13
F.J. Fernández-Carretero , D. González-Santamaría, P. Corengia, M. Brizuela, A. Goñi,	14

and A. García-Luisa <i>Synthesis of Proton Exchange Membranes for Pemfc By Plasma Polymerization</i>	
<u>Jack R. Ferrell III</u> , Timothy A. Strobel, and Andrew M. Herring <i>Recent Results Using Dimethyl Ether and Hydroquinone: Applications to Direct Pem Fuel Cells and Hydrogen Storage</i>	15
M. Geormezi, N. Triantafyllopoulos, <u>N. Gourdoupi</u> , V. Deimede, G. Paloumbis, J.K. Kallitsis, and S. Neophytides <i>High Temperature Membrane Electrode Assemblies and their Fuel Cell Performance</i>	16
<u>Markus Gross</u> , Robert Gaertner, Hans-Georg Herz, and Gerhard Maier <i>Stable Anion Conducting Polymers for Alkaline Fuel Cells</i>	17
<u>Ruilan Guo</u> , Ozma R. Lane, and James E. Mcgrath <i>Initial Studies On Graft Copolymer of Polyethylene Oxide (PEO) With Phenolphthalein (PPH)-Poly(Arylene Ether Sulfone) (BPS) for Proton Exchange Membrane Application</i>	18
Chris J. Cornelius, Cy H. Fujimoto, and <u>Michael R. Hibbs</u> <i>Poly(Phenylene)-Based Anion Exchange Membranes for Alkaline Fuel Cells</i>	19
<u>S. Hink</u> and E. Roduner <i>Electrochemical AFM Measurements of Polymer Electrolyte Fuel Cell Membranes</i>	20
<u>Jun-Kyu Choi</u> , Ji-Young Park, Jong-Ho Choi, and <u>Young Taik Hong</u> <i>Comparative Study of Block And Random Proton Exchange Membranes Based on Sulfonated Poly(Arylene Ether Sulfone)S</i>	21
Ha-Na Ko, Jong-Ho Choi, Jun-Kyu Choi, Hyung-Joong Kim, and <u>Young Taik Hong</u> <i>Synthesis And Characterization of Ionic Crosslinkable Sulfonated Poly(Arylene Ether Sulfone)S for Direct Methanol Fuel Cells</i>	22
<u>Kyungseok Yoon</u> , Jong-Ho Choi, Sung-Kwon Hon, Sang-Young Lee, and <u>Young Taik Hong</u> <i>Synthesis and Properties Of Silica/Sulfonated Poly(Arylene Ether Sulfone) Nanocomposite Membrane as Polymer Electrolyte Membrane For Fuel Cells</i>	23
<u>James L. Horan</u> , Mei-Chen Kuo, Sonny Sachdeva, Steven F.Dec, and Andrew M. Herring <i>Polyoxometalate Based Proton Exchange Membranes – Synthesis, Morphology and Proton Dynamics</i>	24
<u>Naohiro Hoshikawa</u> , Naoki Hasegawa, Akihiko Koiwai, Masaya kawasumi, Satoru Yamamoto, Shi-aki Hyodo, Yu Morimoto, and Tomohiro Nakano <i>A Computer Simulation Study of Mesoscopic Structures of Lower EW Purfluorinated Polyelectrolyte Membranes Using a Dissipative Particle Dynamics Method</i>	25
Deuk Ju Kim, <u>Hae Young Hwang</u> , Hyoung-Juhn Kim, and Sang Yong Nam <i>Preparation and Properties of Reinforced Polysulfone Support Membranes for Fuel Cell Applications</i>	26
<u>Hae Young Hwang</u> , Young Taik Hong and Sang Yong Nam <i>Sulfonated Poly(arylene ether sulfone) (SPAES) – Sulfonated Silica Composite Membranes for Direct Methanol Fuel Cells</i>	27
<u>Hae Young Hwang</u> , Young Taik Hong, and Sang Yong Nam <i>Sulfonated Poly(arylene ether sulfone) (SPAES) Proton Conducting Membranes containing Modified Clay Particles</i>	28

Won Ho Choi and <u>Won Ho Jo</u> <i>Preparation of A New Proton Exchange Membrane Based on Self-Assembly of P(S-Co-SSA)-B-PMMA/PVDF Blend</i>	29
Yoshiyuki Teraji, Teruaki Hayakawa, and <u>Masa-Aki Kakimoto</u> <i>Multiblock Sulfonated Poly(Phenylene Sulfone)S for Proton Exchange Membranes</i>	30
<u>Koh Kidena</u> , Takahiro Ohkubo, Libin Wu, Mohamed Hamdy F.M., Naohiko Takimoto, and Akihiro Ohira <i>Relaxation and Freezing Behavior of Water In PFSA and Hydrocarbon Electrolyte Membranes</i>	31
<u>Jip Kim</u> , Ki Hyun Lee, and Byoung Chul Kim <i>Preparation and Properties of Electrospun PVDF-HFP Nanofibers</i>	32
<u>Oh Joo Kwon</u> , In Kyu Song, and Byoung Chul Kim <i>Preparation of Large Specific Surface Area Carbon Nanofiber by Electrospinning Of PAN/CA Blends</i>	33
<u>Ramanathan S. Lalgudi</u> , Jay R. Sayre, and Bhima R. Vijayendran <i>High-Temperature, Low-Humidity Hydrocarbon Electrode Binders for Polymer Electrolyte Fuel Cells</i>	34
<u>O Lane</u> <i>Characterization of Structure-Property Relationships in Multiblock Poly(Disulfonated Polyarylene Ether Sulfone) Proton Exchange Membranes</i>	35
<u>Mikkel Juul Larsen</u> , Yue Ma, Huan Qian, Hans Toftlund, Peter B. Lund, and Eivind M. Skou <i>Stability of Radicals In Electron-Irradiated Fluoropolymer Film for the Preparation of Graft Copolymer Fuel Cell Electrolyte Membranes</i>	36
<u>Hae-Seung Lee</u> , Ozma Lane, and James E. Mcgrath <i>Synthesis and Characterization Of Multiblock Copolymers Using Hydroquinone-Based Hydrophilic Blocks for Proton Exchange Membrane (PEM) Applications</i>	37
Myung-Hwan Jeong, Kwan-Soo Lee, and <u>Jae-Suk Lee</u> <i>Fluorinated Aromatic Polyethers Containing Crosslinking Moiety for Proton Exchange Membranes</i>	38
Yo Han Kwon, So Soon Yong, Sung Chul Kim, and <u>Sang-Young Lee</u> <i>Semi-IPN Membranes of Poly(Arylene Ether Sulfone) for Direct Methanol Fuel Cells</i>	39
<u>Clovis A. Linkous</u> , Stephen L. Rhoden, William G. Linkous, Benjamin P. Pearman, and Nahid Mohajeri <i>Overcoming Water Uptake and Conductivity Issues of SPEEK Membranes</i>	40
<u>Shuang Ma</u> , Madeleine Odgaard, and Eivind M. Skou <i>PEMFC Durability Studies</i>	41
<u>Jordan Mader</u> and Brian C. Benicewicz <i>Novel Sulfonated Polybenzimidazoles for PEM Fuel Cell Use</i>	42
Vincent Martin, <u>Catherine Marestin</u> , and Régis Mercier <i>Synthesis and Characterization of New Phosphonic Acid Containing Monomers and Poly(Aryl Ether)S Made Thereupon</i>	43

Angelika Manhart, Anke Kaltbeitzel, Giorgi Titvinidze, and Wolfgang H. Meyer <i>Optimization of Highly Sulfonated Polysulfones for FC-Applications</i>	44
Kenji Miyatake , Byungchang Bae, and Masahiro Watanabe <i>Sulfonated Poly (Arylene Ether Sulfone) Ionomers: Effect of Hyrdophobic Groups on the Properties</i>	45
Beatrice Muriithi And Douglas A. Loy <i>Preparation and Characterization of Ex-Situ Silica-Nafion® Nanocomposite Membranes With Different Size Particles for Application in PEM Fuel Cells</i>	46
Akihiro Ohira , Kayo Ohira, and Koh Kidena <i>Investigation of Chemical Stability of Polymer Electrolyte Membrane for Polymer Electrolyte Fuel Cell</i>	47
David Olmeijer, Polyfuel	48
Atsuhiko Onuma and Makoto Morishima <i>Evaluation of Micro-Phase-Separated Structures in Hydrocarbon Polymer Electrolyte Membranes by Stained SAXS Method</i>	49
PO Osifo , A Masala, and H Van Der Merwe <i>Developing a New Biopolymeric Material for Use as an Electrolyte Separation In Fuel Cells</i>	50
Kirt A. Page , Kevin Yager, and Alamgir Karim <i>Small-Angle Neutron and X-ray Scattering Study of the Complex Morphology of Nafion/PVDF Blends</i>	51
Jong Keun Park TBA	52
Benjamin Pearman , Nahid Mohajeri, Marianne Rodgers, Darlene Slattery, Leonard Bonville, Russell Kunz, and James Fenton <i>Effect of Solvent on the Proton Conductivity of PFSA Membranes</i>	53
Guoqing Qian and Brian C. Benicewicz <i>Phosphoric Acid Movement in Phosphoric Acid Doped Polybenzimidazole Membrane-Electrode-Assemblies</i>	54
Sonny Sachdeva , Neeraj Sharma, Steven J. Hamrock, and Andrew M. Herring <i>Characterization of Heteropolyacid Immobilized Proton Exchange Membranes</i>	55
Kyung a. Sung , Wan-Keun Kim, Keun-Hwan Oh, and Jung-Ki Park <i>The Catalyst Layer Containing Sulfonated Poly (ether ether ketone) as the Electrodelonomer for Polymer Electrolyte Fuel Cells</i>	56
Norimitsu Takeuchi and Thomas F. Fuller <i>Investigation of Membrane Influence on Carbon Loss on PEMFC Electrodes</i>	57
Naohiko Takimoto and Akihiro Ohira <i>Morphology-Proton Conduction Relationships of Pems Investigated by Electrochemical Atomic Force Microscopy</i>	58
Shogo Takamuku, Mitsutaka Abe, Naohiko Takimoto , Akihiro Ohira, Hae-Seung Lee, and James E. McGrath <i>Understanding of Fuel Cell Performance of Multiblock Copolymers Based on Disulfonated Poly(Arylene Ether Sulfone) by Novel Measurements</i>	59

<u>Rachael Vanhouten</u> , Ozma Lane, and J.E. McGrath <i>Fluorinated-Sulfonated, Hydrophobic-Hydrophilic Segmented Copolymers for Proton Exchange Membranes</i>	60
<u>Earl Wagener</u> , Dennis Smith (Clemson University) Chris Topping, Rahula Jayasinghe, Jack Jin, Akhilesh Singh, <u>Sean M. MacKinnon</u> , Timothy J. Fuller, and Craig S. Gittleman <i>Perfluorocyclobutane Based PEMS for Automotive Applications</i>	61
<u>Kyungseok Yoon</u> , Jong-Ho Choi, Sung-Kwon Hong, Sang-Young Lee, and Young Taik Hong <i>Synthesis and Properties of Silica/Sulfonated Poly(Arylene Ether Sulfone) Nanocomposite Membrane as Polymer Electrolyte Membrane for Fuel Cells</i>	62
