

February 24 - 27, 2013 \* Asilomar Conference Grounds \* Pacific Grove, California USA

---

M. J. Heinzer, S. Han, J.A. Pople, S. M. Martin, and <b><u>D. G. Baird</u></b> Ordering Kinetics of Block Copolymers in Solution During Solvent Removal: Effect on Membrane Performance	<b>1</b>
<b><u>Sarah B. Black</u></b> and Michael A. Hickner The Effects of Side Chain Acidity and Backbone Polarity on Water-Polymer Interactions	<b>2</b>
<b><u>Bo Peng</u></b> , Xiao Chu, Yuyan Li, Desheng Li, Yongming Chen, and Jiang Zhao Adsorption and Desorption Kinetics of Poly(ethylene oxide)-block-Polystyrene Micelles on Polystyrene Surface	<b>3</b>
<b><u>Blaine M. Carter</u></b> , Brian R. Wiesenauer, Richard D. Noble, and Douglas L. Gin Thin-Film Composite Lyotropic Liquid Crystal Polymer Membranes with Monodisperse Nanopores for Water Filtration Applications	<b>4</b>
Wang Ying and <b><u>Moshe Herzberg</u></b> Fouling Potential and Cleaning Efficiency on Model Polyamide Surfaces and RO Membranes	<b>5</b>
Yael Shabtai And <b><u>Moshe Herzberg</u></b> Relations between Biofilm Viscoelasticity and Biofouling Extent of Reverse Osmosis Membranes: Case Study of Cellulose in the EPS Matrix	<b>6</b>
<b><u>Kaitlin Johnson</u></b> and Mary Laura Lind Evaluation of Reverse Draw Solute Flux Through Commercially Available Membranes in Forward Osmosis Processes	<b>7</b>
Sophia Belfer, Roza Fainstein, and <b><u>Roni Kasher</u></b> Nanoscale Spherical Copolymers Grafted on Water Treatment Membranes	<b>8</b>
<b><u>Jennifer E. Klare</u></b> High Performance Forward Osmosis (FO) Membranes and Portable Energy- Efficient FO/RO Desalination System	<b>9</b>
<b><u>Xiao Wang</u></b> , Dufei Fang, Benjamin Hsiao, and Benjamin Chu Nano-Filtration Membranes based on Thin-Film Nano-Composites	<b>10</b>
<b><u>Zhe Wang</u></b> , Benjamin S. Hsiao, and Benjamin Chu Nanofibrous Cellulose Composite Membrane with a Poly(ethylene glycol) Diacrylate Top Layer	<b>11</b>
<b><u>Brian R. Wiesenauer</u></b> , Erik J. Wislinsky, Blaine M. Carter, Richard D. Noble, and Douglas L. Gin Nanopore Size-Tuning Of Q <sub>i</sub> -Phase Lyotropic Liquid Crystal Polymer Membranes and the Synthesis of New, More Economical Imidazolium-Based Monomers for Water Nanofiltration Applications	<b>12</b>

---

February 24 - 27, 2013 \* Asilomar Conference Grounds \* Pacific Grove, California USA

---

<b>He Xie</b> , Brian Chaloux, Tim Tighe, Tomonori Saito, Xiaozhe Hu, and Michael A. Hickner	
Surface Charge and Surface Adsorption of Protein and Ions on Ion-Containing Membranes	<b>13</b>
<hr/>	
<b>Tsung Ming Yeh</b> , Devinder Mahajan, Benjamin S. Hsiao, and Benjamin Chu	
High Flux Ethanol Dehydration using Multilayered Graphene Oxide Membranes	<b>14</b>

---
